

LATEST GLOBAL FACTS (2026)

RAG-ready reference document • Facts verified or updated through 1 October 2026

IMPORTANT USE NOTE

This document is a dated snapshot, not a live database. Facts that can change quickly (political offices, software releases, AI products, and platform versions) should be re-verified when answering questions that explicitly ask for the current or latest status. The document is formatted as short factual statements so it can be chunked, embedded, and retrieved efficiently in RAG systems.

GLOBAL POLITICAL LEADERS (verified 2026)

Country / role	Current office holder
United States — President	Donald J. Trump
United States — Vice President	JD Vance
India — Prime Minister	Narendra Modi
India — President	Droupadi Murmu
United Kingdom — Prime Minister	Andy Burnham
France — President	Emmanuel Macron
Germany — Federal Chancellor	Friedrich Merz
Canada — Prime Minister	Mark Carney
Russia — President	Vladimir Putin
China — President	Xi Jinping
Brazil — President	Luiz Inácio Lula da Silva

Verification examples: the White House identifies Donald J. Trump as the 45th and 47th U.S. President; USAGov identifies Trump and JD Vance as the current President and Vice President. India's PMO lists Narendra Modi as Prime Minister as of 25 July 2026, and the President of India's official site identifies Droupadi Murmu as President. UK government records state that Andy Burnham became Prime Minister on 20 July 2026. Germany's federal government identifies Friedrich Merz as Federal Chancellor. Canada's PM site identifies Mark Carney as Prime Minister. France's Élysée site refers to Emmanuel Macron as President in September 2026. Brazil's government refers to Luiz Inácio Lula da Silva as President in June 2026.

TECHNOLOGY & AI — 2026 SNAPSHOT

- Python: Python 3.14 is the latest feature-release series. Python 3.14.8 was released on 30 September 2026.
- Java: JDK 26 is the latest Java SE platform release; JDK 25 is the latest LTS release.
- Android: Android 17 is the current major Android platform generation documented by Android Developers.
- Apple software: Apple began rolling out iOS 27, iPadOS 27 and macOS 27 on 14 September 2026.
- Docker Engine: Docker Engine 29 is the current major release line; Docker Engine 29.8.2 was released on 30 September 2026.
- Kubernetes: Kubernetes 1.35 is an actively supported release line; 1.35.9 was released on 15 September 2026.
- AI models: AI model catalogs change rapidly. For RAG applications, model names should be treated as time-sensitive facts and verified against the provider's current documentation.

AI / SOFTWARE ENGINEERING FACTS

- RAG (Retrieval-Augmented Generation) combines retrieval from an external knowledge source with an LLM generation step.
- Vector databases are commonly used to store embeddings and perform semantic similarity search.
- Embeddings represent text or other data as numerical vectors that can be compared for semantic similarity.
- A production RAG system should distinguish between static knowledge (documents) and time-sensitive knowledge (live information).
- A dated PDF should be treated as historical or snapshot context when a user asks for information that may have changed after the document's date.
- For questions containing words such as 'current', 'latest', 'today', or 'now', a live source is preferable when freshness matters.

SOFTWARE VERSION REFERENCE

Technology	2026 reference
Python	3.14.8 (released 30 Sep 2026)
Java / JDK	26.0.2.1 (Aug 2026 release update)
Android	17
iOS / iPadOS / macOS	27 / 27 / 27
Docker Engine	29.8.2
Kubernetes	1.35.9

RAG ingestion note: this document intentionally uses short, self-contained factual bullets. When a newer edition is created, replace the older PDF in the vector store or rebuild the index so stale chunks are not retrieved alongside the new ones.
